### Introduction to classification units

We group all firms into classification units based on the products produced, the services provided, and the processes, technology, or materials used. The base premium rate reflects the cost of compensation and prevention in the classification unit.

This classification unit description provides an overview of the classification unit for general guidance only. Firms are classified based on this, our classification policies, Rate and Classification List, and other relevant classification unit descriptions. The items listed below are examples only; they are intended to be illustrative (not exhaustive). Every example may not apply to every firm in the classification unit.

### Description

This classification unit covers firms that both operate ski hills or ski lifts or those that operate tramways, gondolas, or cable cars associated with a ski hill. Ski rental, when conducted in conjunction with the operation of a ski hill, is also covered in this classification unit.

Firms in this classification unit may engage in additional activities that support their business undertaking. These activities include finance and administrative support and may also include:

### Hazard rating assignment

Based on the nature and extent of the risks and hazards in this classification unit, firms in this classification unit are assigned a moderate hazard rating for the purpose of defining first aid-related requirements (i.e., the application of G3.16, First aid assessment, in the Occupational Health and Safety Regulation). This section of the Regulation specifies mandatory minimum levels of first aid, including what type of first aid kits, facilities, and equipment are required.

### When to contact us

- 3) ski rental when conducted in conjunction with a separate sports equipment rental operation (see CU 741004); or
